

# Client/Server to New Technology Migration

Krishna Collie  
Steve Hughes

# Strategy

- Strengthen support and responsibility for the migration effort.
  - Define an Advocate, Task Manager and Team
- Plan and design the foundation of the system to minimize future investment.
- Define hard dates for migration. Get Oracle to define date when they drop support.
- Show success – prove it can be done
- Explore elegant ways to get to solution

# Priorities

- Shared Components
  - Person Module
  - Org Hierarchy
  - E-Request
  - Single Sign-on
  - E-Notification

# Priorities

- Functional Components
  1. Grants Management
  2. Trainee Appointments
  3. Committee Management/Peer Review
  4. Population Tracking
  5. Receipt & Referral

# Justification

- Execute on shared modules first to ensure component adoption into core systems.
- Analyze business processes of major components and execute following shared module implementation.
- Build a chart of components to show achievements
